

Oxane signs two more clients for Loan Servicing 2.0 offering

Oxane Partners (Oxane), a technology-driven solutions provider to private markets, has signed two more clients, AllianceBernstein and Edmond de Rothschild REIM, for its Loan Servicing 2.0 offering.

Earlier this year, Oxane won multiple mandates to act as facility agent and security agent on real estate and maritime loans, signing up with three real estate lenders, a global bank and an alternative investment firm.

Real estate lenders are increasingly opting to work with a single provider that can support their technology, servicing, and operations needs instead of signing up multiple counterparties and complicating data and process workflows. With Oxane's proven real estate technology platform, a team of real estate experts, and its fresh approach to servicing with 'Loan Servicing 2.0', Oxane is emerging as the solution provider of choice for lenders.

Oxane's award-winning technology platform, Oxane CREST, supports diverse real estate assets, complex transaction structures and enables tight controls through the loan lifecycle - from deal origination until exit. With these digital-first capabilities extended to loan servicing, lenders get complete transparency and better control in managing their portfolios.

Clark Coffee, Chief Investment Officer, European Commercial Real Estate Debt at AllianceBernstein, says: "We prioritised our operational and technology infrastructure selection in conjunction with the launch of our European platform. We selected Oxane after an extensive RFP process, as their investment management technology, loan servicing, and support services measured up to our requirements."

Ralf Kind, Managing Director and Head of Real Estate Debt at Edmond de Rothschild REIM, says: "We wanted a digitally-enabled loan servicing offering to augment the expansion of our real estate debt platform in Europe. With Oxane's technology driven servicing solutions, we are well-positioned to work with our borrowers across Europe efficiently and seamlessly."

Vishal Soni, co-founder at Oxane Partners, adds: "We are excited to work with AllianceBernstein and Edmond de Rothschild REIM and support their expansion plans. Our unified solution is aimed to help investment firms hit the ground running faster without spending too much time on operationalising processes, and setting up technology infrastructure. We offer a launchpad to new funds that brings greater efficiency, control, and future-readiness for sustained growth."
